

Why do you have to use licensed program?

What is software license? Why it is needed?

Software license is a document protecting the rights of the copy right owner. It is needed to have a license for every software because it shows that your not overriding the copyrights of the producer and pay the price of his/her effort. The rights of the copyright owner are also protected by t he law. The law of copyright stands for the inhibition of software copy without permission. No one can copy and distrubute or use the work of copy right owner without his/her permission. Copying a computer program without permission and get an illegal version of it is against the law.
